

## Tamper Evident Price Gun Labels with Security Slits

Tamper-Proof **Labels**. Prevent **price** switching!! Tamper-Evident **labels** have **Security Slits** scored into the **label** that prevent **label** switching by customers. See the photo below.

*Label shown with security slits*

The labels with security slits fit your label guns the same as labels without security slits. The only difference is they have little razor slits in them that causes them to break apart in little pieces if someone tries to switch price stickers on a product. Some stores have problems with customers peeling off a price sticker from one product and placing it on another product to get a lower price at the register. This is called "price switching".
